## RESEARCH EXPERIENCE

### Research Assistant, May 2019 – present

Social Computing Group, Idiap Research Institute, Martigny, Switzerland

• Developing privacy-preserving graph neural network models using differential privacy to reduce the privacy risks of using graph representation learning algorithms in real applications.

Research Intern, March 2022 – May 2022

Brave Software, San Francisco, CA, USA (Remote)

• Worked on federated reinforcement learning algorithms to build privacy-preserving recommendation systems for Brave's ads and news recommendation.

Research Assistant, Nov 2014 – May 2019

Data Science and Machine Learning Lab, Sharif University of Technology, Tehran, Iran

- Privacy-Preserving Deep Learning: Worked on a hybrid mobile-server learning architecture based on Siamese fine-tuning and split learning to make non-private pre-trained deep learning models privacy-preserving at the inference stage.
- Web Data Science: Analyzed a large-scale collection of recipes published on the web and their content, aiming to understand cuisines and culinary habits around the world.
- <u>Social and Information Networks:</u> Developed time-aware link prediction algorithms over heterogeneous social networks using recurrent neural networks and non-parametric machine learning.
